

IN THE CLAIMS

- sub-D
C)
1. (currently amended) A method of WWW page retrieval from a web site, comprising:
 - entering information associated with a content of the site, which information is not a WWW address or a portion thereof, which entering comprises typing by a user;
 - providing said information to a software not associated with said site;
 - providing a page address of a page of said site, responsive to said entered information, by said software;
 - retrieving said page responsive to said page address; and
 - directly displaying said page, using a browser, without any additional user intervention, beyond said entering,
 - wherein said information is entered in a non-Latin language.
 2. (original) A method according to claim 1, comprising providing user-dependent information and wherein providing a page address comprises analyzing said information using said user-dependent information.
 3. (currently amended) A method according to ~~any of the preceding claims~~ claim 1, wherein providing a page address comprises selecting a URL from a translation table in which said information is a unique index.
 4. (canceled).
 5. (currently amended) A method according to claim 1125, wherein said database is at least logically associated with a particular user.
 6. (original) A method according to claim 5, wherein said database includes information regarding a particular user, which information is entered by said user, which page is selected for display responsive to said information and wherein said database is stored at a location remote from where the information is entered for display of said page.
 7. (currently amended) A method according to claim 112-4 ~~or claim 5~~, wherein said database comprises at least one association which is particular to said particular user.

8. (original) A method according to claim 7, wherein analyzing comprises analyzing responsive to said at least one association.
9. (currently amended) A method according to ~~any of claims 7-8~~ claim 7, wherein said at least one association is entered by said particular user.
10. (currently amended) A method according to ~~any of claims 7-9~~ claim 7, wherein said at least one association is automatically generated responsive to a selection of a WWW page, from a plurality of suggested pages, by said particular user.
11. (original) A method according to claim 7, wherein at least one association in said database is automatically generated responsive to a selection of a particular WWW page, from a plurality of suggested pages, by a plurality of users.
12. (currently amended) A method according to ~~claim 11~~ claim 4 or ~~claim 5~~, wherein said database is at least logically associated with a translation server, which utilizes said database for translation.
13. (currently amended) A method according to ~~any of claims 5-12~~ claim 5, wherein said at least logical association comprises a physical association.
14. (currently amended) A method of WWW page retrieval from a web site, comprising:
 entering information associated with the content of the site, which information is not a WWW address or a portion thereof, which entering comprises typing by a user;
 providing said information to a software not associated with said site;
 analyzing said information using user-dependent information;
 providing a page address of a page of said site, responsive to said entered information and said analysis, by said software;
 retrieving said page responsive to said page address; and
 directly displaying said page, using a browser, without any additional user intervention, beyond said entering.

15. (currently amended) A method according to ~~any of the preceding claims, claim 14~~ wherein providing comprises providing responsive to a geographical location at which said information is entered.

16. (currently amended) A method of WWW page retrieval from a web site, comprising:
entering information associated with the content of the site, which information is not a WWW address or a portion thereof, which entering comprises typing by a user;
providing said information to a software not associated with said site;
analyzing said information responsive to a geographical location at which said information is entered;
providing a page address of a page of said site, responsive to said entered information and said analysis, by said software;
retrieving said page responsive to said page address; and
directly displaying said page, using a browser, without any additional user intervention, beyond said entering.

17. (currently amended) A method according to ~~any of the preceding claims~~ claim 16, wherein said information is entered by a user in a same way in which a standard URL would be entered.

18. (original) A method according to claim 17, wherein said information is entered into a URL entry field in said browser.

19. (currently amended) A method according to claim 1-16, wherein said information is entered into a window overlaying said browser.

20. (original) A method according to claim 19, wherein said window is overlaying a location window of said browser.

21. (currently amended) A method of WWW page retrieval from a web site, comprising:
entering information associated with the content of the site, which information is not a WWW address or a portion thereof, which entering comprises typing by a user;
providing said information to a software not associated with said site;

providing a page address of a page of said site, responsive to said entered information, by said software;

retrieving said page responsive to said page address; and

directly displaying said page, using a browser, without any additional user intervention, beyond said entering,

wherein said information is entered into a URL entry field in said browser.

Claims 22-85 (canceled).

86. (currently amended) A method according to claim ~~85~~ 135, wherein said incorrect e-mail address comprises information associated with a desired e-mail addressee.

87. (original) A method according to claim 86, wherein said information comprises at least a portion of a geographical address.

88. (original) A method according to claim 86, wherein said information comprises at least a portion of a telephone number.

89. (new) A method of WWW page retrieval from a web site, comprising:
entering one or more words into a browser program, the one or more words not comprising a WWW address or a portion thereof, which entering comprises typing by a user;
providing said one or more words to software at a first location other than the location of said browser;
providing a page address of a page stored at a second location, responsive to said entered one or more words, by said software;
retrieving said page stored at a second location responsive to said page address; and
directly displaying said page, using said browser, without any additional user intervention, beyond said entering; wherein
providing the page address of the page stored at the second location comprises performing an automated web search.

90. (new) A method according to claim 89 wherein providing said one or more words comprises providing only one word.

91. (new) A method according to claim 1, wherein providing the page address, comprises performing an automated web search.

92. (new) A method according to claim 14, wherein providing the page address, comprises performing an automated web search.

93. (new) A method according to claim 16, wherein providing the page address, comprises performing an automated web search.

94. (new) A method according to claim 21, wherein providing the page address, comprises performing an automated web search.

95. (new) A method according to claim 1, wherein said providing the page address comprises retrieving information about a site from a location, and comprising updating of said information by an operator of said site.

96. (new) A method according to claim 16, wherein said information is in a non-Latin language.

97. (new) A method according to claim 21, wherein said information is in a non-Latin language.

98. (new) A method according to claim 85, wherein said information is in a non-Latin language.

99. (new) A method according to claim 89, wherein said information is in a non-Latin language.

100. (new) A method according to claim 1, wherein said information is entered into a URL entry field in said browser.

101. (new) A method according to claim 14, wherein said information is entered into a URL entry field in said browser.
102. (new) A method according to claim 21, wherein said information is entered into a URL entry field in said browser.
103. (new) A method according to claim 89, wherein said information is entered into a URL entry field in said browser.
104. (new) A method according to claim 1, wherein providing a page address comprises providing responsive to a popularity level of said page.
105. (new) A method according to claim 1, wherein providing a page address comprises providing based upon statistical information correlating said entered information and websites.
106. (new) A method according to claim 1, including adding a user interface functionality to said browser, which functionality is used for interaction with said site.
107. (new) A method according to claim 106, wherein said interface comprises icons.
108. (new) A method according to claim 106, wherein said interface comprises one or more menus.
109. (new) A method according to claim 106, wherein said functionality comprises a purchase function.
110. (new) A method according to claim 106, wherein said functionality operates based on information stored in a database.
111. (new) A method according to claim 109, wherein said database contains information arranged by site.

112. (new) A method according to claim 1, wherein said page address is determined using a database of associations.

113. (new) A method according to claim 14, wherein said information is in a non-Latin language.

114. (new) A method according to claim 1, wherein said information does not meet domain name specifications.

C 115. (new) A method according to claim 1, wherein said information does not meet URL specifications.

116. (new) A method according to claim 1, wherein said information comprises a plurality of words.

117. (new) A method according to claim 1, wherein said information comprises a field identifier and a field-match value.

118. (new) A method according to claim 1, wherein said information is associated with an owner of the site.

119. (new) A method according to claim 118, wherein said information comprises a partial street address of said owner.

120. (new) A method according to claim 118, wherein said information comprises a telephone number of said owner.

121. (new) A method according to claim 1, comprising analyzing said information to determine a single translation thereof.

122. (new) A method according to claim 121, wherein analyzing comprises correcting spelling in said information.

- C/
123. (new) A method according to claim 122, wherein correcting spelling comprises correcting for at least one transliteration error.
124. (new) A method according to claim 121, wherein analyzing comprises applying natural language recognition on said information.
125. (new) A method according to claim 121, wherein analyzing comprises blocking access to certain types of sites.
126. (new) A method according to claim 121, wherein said translation comprises a only domain name.
127. (new) A method according to claim 126, wherein said translation comprises a URL.
128. (new) A method according to claim 121, wherein said analyzing is performed locally, where said page is displayed.
129. (new) A method according to claim 121, wherein said analyzing is performed remotely from where said page is displayed.
130. (new) A method according to claim 121, wherein said analyzing comprises determining a one-to-one mapping between said information and a translation.
131. (new) A method according to claim 1, wherein said information is entered in a language not supported by said browser.
132. (new) A method according to claim 1, wherein said information is entered in a font not supported by said browser.
133. (new) A method according to claim 1, wherein directly displaying said page, comprises automatically providing password information for accessing said page.
